

Contents

Chapter 1 — Purpose and Need	1-1
Development of Oil and Gas on Federal Lands in the Powder River Basin	1-1
Purpose of and Need for the Proposed Action	1-3
NEPA Process, Including Tiering and Decision Making	1-5
Decisions to be Made Based on this NEPA Analysis	1-6
Decisions to be Made Following this NEPA Process	1-6
Authorizing Actions	1-7
Chapter 2 — Public Participation, Issue Identification, and Alternatives	2-1
Public Participation	2-1
Issue Identification and Issue Statements	2-2
Process Used to Develop Alternatives	2-7
Alternatives Considered in the NEPA Analysis	2-8
Alternatives Analyzed in Detail	2-8
Alternative 1 — Proposed Action	2-8
Coal Bed Methane Development	2-9
Drilling of Wells and Construction of Production Facilities	2-10
Well Access Roads	2-10
Well Pads	2-20
Drilling	2-20
Well Production Facilities	2-22
Pipelines	2-22
Facilities for the Gathering and Disposing of Produced Water	2-23
Surface Discharge Analysis Assumptions	2-23
Infiltration Impoundments Analysis Assumptions	2-23
Containment Analysis Assumptions	2-26
Land Application Disposal Analysis Assumptions	2-27
Injection Analysis Assumptions	2-27
Central Metering Facilities	2-27
Electrical Power Utilities	2-28
Gas-Delivery System	2-29
Workforce Requirements	2-34
Construction Resource Requirements	2-34
Production and Maintenance	2-34
Roads	2-34
Wells	2-36
Pipelines	2-37
Electrical Utilities	2-37
Decommissioning and Reclamation	2-37
Roads	2-37
Wells	2-38
Pipelines	2-38
Electrical Utilities	2-38
Non-CBM Development	2-38
Safety/Emergency Response	2-39

Geologic Hazards.....	2-40
Fires and Explosions.....	2-40
Public Safety.....	2-41
Employee Safety.....	2-41
Water Monitoring and Mitigation.....	2-42
Ground Water.....	2-42
Surface Water.....	2-42
Alternative 2 — Proposed Action with Reduced Emission Levels and Expanded Produced	
Water Handling Scenarios.....	2-43
Methods for Handling Produced Water.....	2-43
Compression.....	2-43
Alternative 3 — No Action.....	2-45
Coal Bed Methane Development.....	2-52
Drilling and Construction of Facilities.....	2-59
Electrical Power Utilities.....	2-59
Workforce Requirements.....	2-59
Construction Resource Requirements.....	2-60
Non-CBM Development.....	2-61
Alternatives Considered but Eliminated from Detailed Analysis.....	2-62
Impact and Mitigation Monitoring and Reporting.....	2-66
Summary of Alternatives and Environmental Consequences.....	2-66
Agency-Preferred Alternative.....	2-67
Chapter 3 — Affected Environment.....	3-1
Groundwater.....	3-1
Regional Characterization.....	3-1
Aquifer Types.....	3-1
Quaternary Alluvial Aquifers.....	3-2
Northern Great Plains Aquifer System.....	3-2
Lower Tertiary Aquifer System.....	3-2
Wasatch Aquifers.....	3-3
Fort Union Aquifers.....	3-3
Lebo Confining Layer.....	3-4
Tulloch Aquifer.....	3-4
Groundwater Chemistry.....	3-4
Confined (Artesian) vs. Unconfined Conditions.....	3-6
Groundwater Flow Systems (Groundwater Recharge vs. Groundwater Discharge Areas).....	3-8
Water Yield.....	3-9
Groundwater Use.....	3-10
Surface Water.....	3-14
Regional Characterization.....	3-14
Characteristics of River Basins and Surface Drainage Systems.....	3-14
Surface Water Quantity.....	3-17
Natural Streamflow.....	3-17
Peak Flow/Stormwater Flow.....	3-18
Evaporation.....	3-18
Infiltration.....	3-19
CBM Produced Water.....	3-20
Discharge Outfalls.....	3-20
Discharge Volumes/Flow.....	3-20
Surface Water Quality.....	3-23
Ambient Water Quality.....	3-23

Metals.....	3–23
Dissolved Solids.....	3–23
Suspended Sediment	3–24
Sodium Adsorption Ratio.....	3–24
Temperature	3–24
Impaired Water Bodies	3–25
Surface Water Distribution	3–25
Streamflows	3–25
CBM Produced Water.....	3–25
Reservoir Outflows.....	3–26
Surface Water Use	3–26
Permitted Water Diversions/Structures.....	3–26
Municipal Water Sources.....	3–26
CBM Produced Water Use/Treatment.....	3–28
Physiography, Geology, Paleontology, and Mineral Resources	3–30
Physiography	3–30
Geology.....	3–31
Quaternary Alluvial Deposits.....	3–34
Oligocene White River Formation.....	3–34
Eocene Wasatch Formation	3–34
Paleocene Fort Union Formation	3–34
Paleontologic Resources	3–36
Mineral and Energy Resources	3–38
Coal.....	3–38
Coal Bed Methane.....	3–39
Oil and Gas	3–40
Uranium	3–41
Other Minerals	3–41
Geologic Hazards.....	3–42
Earthquake Hazards	3–42
Earthquakes Induced by Injection of CBM Produced Water.....	3–42
Flood Hazards	3–42
Landslide Hazards.....	3–43
Windblown Deposits.....	3–43
Aquifer Collapse and Ground Subsidence	3–43
Gas Migration, Seepage, and Methane Venting	3–43
Spontaneous Combustion of Coals	3–44
Soils.....	3–45
Soil Descriptions.....	3–47
Wind Erosion Hazard.....	3–48
Slope Hazards	3–48
Water Erosion Hazard.....	3–48
Compaction/Shrink-Swell Potential.....	3–51
Salinity.....	3–52
Poor Revegetation Potential.....	3–52
Prime Agricultural Soils	3–53
Air Quality and Climate.....	3–53
Topography.....	3–53
Climate and Meteorology	3–53
Existing Air Quality.....	3–54
Air Quality Related Values — Visibility and Acidification of Lakes	3–55

Visibility	3-55
Acidification of Lakes.....	3-57
Regulatory Framework	3-58
Vegetation and Land Cover Types	3-59
Short-grass Prairie.....	3-63
Mixed-grass Prairie.....	3-63
Wet Meadow.....	3-63
Herbaceous Riparian.....	3-64
Sagebrush Shrubland	3-64
Other Shrubland.....	3-64
Riparian Shrubby.....	3-65
Coniferous Forest.....	3-65

Appendices

- Appendix A Reasonably Foreseeable Development Scenario
- Appendix B Montana–Wyoming Agreement
- Appendix C Conditions of Approval
- Appendix D Mitigation Monitoring and Reporting Plan
- Appendix E Surface Water Quality Data
- Appendix F Project Area Soils Series Characteristics
- Appendix G Water Well Agreement
- Appendix H Biological Assessment
- Appendix I Outline of Treatment Plan for Cultural Resources
